RF Engineer
Event Rental Communications

03/2003 – 02/2005   *Portland, Oregon*
Depending on the event's owner, location, size, topography and other factors I designed and installed temporary-portable-wireless networks for sports events and triathlons. I helped sales securing contracts for sports events for the NBA, PGA, NIKE, Hood to River Run and others by offering solutions that did not exist then building the solution and securing the contracts. I developed my first programming project which was to the NBA by utilizing HTML, CSS, Access, VB/ASP and Symbol barcode reader. I also invented my first prototype for a customer that allowed for wireless control of wireless gates spread-out at distances using two-way rf communications.

Achievements/Tasks

- Designed and erected portable-wireless networks

- Sales Wingman

- Research & Development

- Software Develelopment
